Escanear para obtener la guía completa

## 1. Contenido de la caja

## 3. Bisel frontal

## 4. Cables

- 1. Conecte los cables de red
- 10GBASE-T (1a) o 10G SFP+ (1b)
- 2. Conecte IPMI
- 3. Conecte los cables de alimentación

## € () **R** ⊗

## 5. Conexión a través de consola remota (IPMI) o local

#### 2 Inicie sesión en la consola IPMI

- Obtenga la dirección IP de IPMI desde el servidor DHCP
- La dirección MAC de IPMI se indica en una etiqueta
- Username: ADMIN
- La contraseña puede consultarse en la etiqueta
- Escriba https://ipmi\_ip\_address
- en un navegador web para iniciar sesión en la consola IPMI

••• Q	Please Login Password
3 Cons	ola remota
System Se Remote control	Ver Health Configuration Remote Control Virtual MediaM aintenance Remote Console
Remote Console Power Control Launch SOL	This page can be used to access a server remotely using KVM with Java plug-in or HTML5. To set the Remote Console default interface, please click toos. Current interface: HTML5 Launch Console

Haga clic en el menú Remote Control y, a continuación, haga clic en Launch Console

## 6. Despliegue del dispositivo

Seleccione Setup New Cluster o Join To Cluster y siga las instrucciones del asistente.

Información necesaria:

- Dirección IP del clúster
- 2 direcciones IP de interfaz
- Nombre del clúster
- · Contraseña de administrador

Opción B -

Ĵ

**Consola local** 

#### Conecte un monitor compatible con VGA y un teclado a Ootbi

|--|--|--|

## 7. Creación de clave S3 **y** bucket

Inicie sesión en Management Console con el navegador web mediante el uso de la dirección IP del clúster

#### Login: objectfirst

#### Password: <su contraseña de administrador>

#### Cree una S3 Access Key

S3 key name:	key1
Access key ID:	B03FB5AD2FA34248AD52EC636 8385EF6

Close

#### Cree un Bucket

Consulte el Lado B para configurar el Bucket Ootbi para Veeam
