Vi finns tillgängliga för hjälp via telefon,livechatt och e-post

Skanna för fullständig guide

### 1. Förpackningens innehåll

## 2. Ställning

- 1. Montera yttre skenor i ställning
- 2. Installera inre skenor på Ootbi
- 3. Skjut in Ootbi i ställningen 4. Montera tumskruvlåset

# 3. Frontram

## 4. Kablar

- 1. Anslut nätverkskablar
- 10GBASE-T (1a) eller 10G SFP+ (1b)
- 2. Anslut IPMI

### ⊕ () **R** ⊗

# 5. Anslut via fjärr- (IPMI) eller lokal konsol

Launch Console

## 6. Installation av enheten

Välj installation New Cluster eller Join To Cluster och följ guiden.

Obligatorisk information:

- Klustrets IP-adress
- 2x gränssnitt IP-adress
- Klustrets namn
- Administratörslösenord

## 7. Skapa S3-nyckel och bucket

Logga in på **Management Console** med webbläsare som använder kluster-IP-adress

#### Inloggning: objectfirst

#### Lösenord: <ditt administratörslösenord>

#### Skapa en S3 åtkomstnyckel

#### Klicka på Backup Infrastructure. Klicka sedan på Add repository.

#### 2.1. Välj Object storage × Add Backup Repository Select the type of backup repository you want to add. Direct attached storage Microsoft Windows or Linux server with internal or direct attached storage. This configuration enables data movers to run directly on the server, allowing for fastest performance. Network attached storage Network share on a file server or a NAS device. When backing up to a remote share, we recommend that you select a gateway server located in the same site with the share. Deduplicating storage appliance Dell EMC Data Domain, ExaGrid, HPE StoreOnce or Quantum DXi. If you are unable to meet the requirements of advanced integration via native appliance API, use the network attached storage option instead. Object storage On-prem object storage system or a cloud object storage provider. Object storage can only be used as a Capacity Tier of scale-out backup repositories, backing up directly to object storage is not currently supported. 2.2. Välj S3 Compatible object storage **Object Storage** ${}^{\textcircled{}}$ Select the type of object storage you want to use as a backup repository. S3 Compatible Adds an on-premises object storage system or a cloud object storage provider aws Amazon S3 Adds Amazon cloud object storage. Amazon S3, Amazon S3 Glacier (including Deep Archive) and Amazon Snowball Edge are supported. Coogle Cloud Storage Adds Google Cloud storage. Both Standard and Nearline storage classes are supported. IBM Cloud Object Storage Adds IBM Cloud object storage. S3 compatible versions of both on-premises and IBM Cloud storage offerings are sunnorted. Microsoft Azure Storage Δ Adds Microsoft Azure cloud object storage. Microsoft Azure Blob Storage, Microsoft Azure Archive Storage and Microsoft Azure Data Box are supported. 2.3. Namnge object storage repository New Object Storage Repository R Type in a name and description for this object storage repositor Name Name ObjectFirst Account Description: Created by Administrator at Bucket Mount Server levieu Apply ummar 🗌 Limit concurrent tasks to: 🛛 🚊 Use this setting to limit the maximum number of tasks that can be processed concurrently in cases when your object storage is overloaded or cannot keep up with the number of API requests issued by multiple object storage offload tasks. < Previous Next > Finish Cancel

### Anmärkningar:

# 2.4. Ange enhetens IP-adress, behåll standardinställningen för region us-east-1 och lägg till S3-uppgifter
