

The Ultimate Data Protection Trifecta with Veeam, Object First, and Wasabi

Unlock comprehensive data protection with the powerful trio of The Veeam Data Platform, Object First's on-premise backup appliance, and Wasabi Cloud Object Storage. This solution seamlessly implements the 3-2-1-1-0 data security best practice, helping you implement a zero trust strategy for safety from cyber threats and physical damage. You get the benefits of supercharged storage performance on-premises, and economical long-term data retention in the cloud.

Data Security, Data Recovery, and Data Freedom

Secure, Simple and Powerful Immutable On-Prem Storage

Simple, Fast, Affordable, Immutable Cloud Storage

Resilient Data Protection with the 3-2-1-1-0 strategy

3

Copies of Data

Safeguard your data with three copies, including the production copy.

Met with Object First and Wasabi

2

Different Media Types

Mitigate risks by utilizing at least two distinct storage media types, guarding against the failure of any backup storage target.

Met with Object First and Wasabi

1

Copy Offsite

Establish cyber resilient data protection with at least one backup stored in a physically separated location, giving protection against physical damage.

Met with Wasabi

1

Copy Immutable

Enhance security by maintaining at least one offline or immutable backup, providing an additional layer of defense against cyber threats.

Exceeded with Object First and Wasabi

0

Errors

Having backups alone is not enough. Regularly test your backups to ensure that they can be successfully restored.

Met with Veeam SureBackup and Object First

The strength of The Veeam Data Platform, Object First, and Wasabi Cloud Object Storage enables you to implement a comprehensive 3-2-1-1-0 data strategy, ensuring unmatched data security and integrity.
